

M&G Japan Fund Sterling I Acc

Morningstar Medalist Rating™

Bronze

Morningstar Rating™

★★★★★

Morningstar® Category

Japan Large-Cap Equity

IMA Sector

Japan

Investment Objective

The Fund aims to provide a higher total return (the combination of capital growth and income), net of the Ongoing Charge Figure, than that of the MSCI Japan Index over any five-year period. At least 80% of the Fund is invested directly in equity securities and equity related instruments of companies across any sectors and market capitalisations that are incorporated, domiciled, or do most of their business in Japan. The Fund usually holds a concentrated portfolio of fewer than 60 companies.

Fees and Expenses

How Much Does it Cost?*

Based on investing **GBP 10,000** in this fund over a 5 year period with an expected return of **5%** per year.

The investment would be worth GBP 12,166.02 and **Total fees** would be **GBP 530.14**

If no fees were charged the investment would be worth GBP 12,762.82, this means your growth rate would be 27.63%

Initial set up fee = GBP 0.00

this might be waived by your distributor

*Calculation is based on ex-ante costs

The cost projections quoted are not guaranteed and the actual cost will depend on the performance of your investment. Please note that platform fees and equity trade costs (where applicable) associated with your investment are not included in this illustration.

Royal London Emerging Markets Equity Tilt Fund

Z Acc GBP

28 February 2026

Fund objective

The Fund's financial objective is to achieve a return in line with the MSCI Emerging Markets ex China A GBP Net Return Index (the "Index") over rolling 3-year periods, through a combination of capital growth and income, after the deduction of charges. The Fund's climate objective is to achieve a carbon footprint of at least 10% below that of the Index. The Fund's financial objective is prioritised over the climate objective. The Index has been selected as a target benchmark because the Fund's investments will predominantly be included in the Index, and is therefore an appropriate measure for the Fund's performance. The performance comparator for the Fund is the IA Global Emerging Markets sector (the "IA Sector").

Cumulative performance %

	Cumulative performance %					Annualised %	
	3M	6M	1Y	3Y	5Y	3Y	5Y

Rolling performance

Past performance is not a guarantee or reliable indicator of future returns. The value of investments and the income from them is not guaranteed and may go down as well as up and investors may not get back the amount originally invested. Share class performance is based on mid-day prices, net of fees and gross of taxes, with gross income reinvested unless otherwise stated. Benchmark performance is priced at close of business, gross of fees and taxes. The impact of fees or other charges, including tax, where applicable, can be material on the performance of your investment. The impact of fees reduces your investment. Rolling performance data shown using month end returns.

Risk and reward profile

The SRR (Synthetic Risk and Reward Indicator) rating is a measure used to indicate the risk and reward profile of a fund. It is calculated using historical data (simulated data for share classes less than a year old) and may not be a reliable indication of the future risk profile of the fund. The SRR rating shows how sharply the fund's share price has gone up and down historically. The lowest category does not mean 'risk free'.

Royal London Emerging Markets Equity Tilt Fund - Z Acc GBP - UK - 28 Feb 2026 - Report ID: 297175

Sustainability approach

The sustainability approach and characteristics of the Fund are to:

Improve the climate objective aim to achieve a carbon footprint (carbon consumption) of at least 10% below that of the Index. The calculation for this climate metric is detailed within this page.

Reduce the Fund's exposure, relative to the Index, to companies involved in social controversies, human rights violations, tobacco related business, controversial weapons or poor corporate governance practices.

Climate metrics

	Fund	Benchmark	Difference %
Carbon footprint (tCO ₂ e/\$M invested)	90.17	113.30	(20.41)
Carbon footprint coverage	99.22%	99.00%	0.22
Weighted average carbon intensity (tCO ₂ e/\$M sales)	189.43	270.33	(29.93)
Weighted average carbon intensity coverage	99.38%	99.16%	0.22

All climate metrics presented above are for Scope 1-2 emissions. Unless specified in the objective, the data is for information only and should not be taken to mean they are being managed to/controlled.

Engagements

Engagement activity	Fund 3 months	Fund 12 months
Number of entities engaged	8	22
Number of engagements	9	39

This is an estimate. Some engagements at the issuer level may not have been attributed to the specific bond held in the fund, resulting in a lower number of engagement activities.

Total engagements by theme and topic

Voting category breakdown

Royal London Emerging Markets Equity Tilt Fund - Z Acc GBP - UK - 28 Feb 2026 - Report ID: 297175

For further information on our stewardship activities, please see our Stewardship & Responsible Investment Report

Key concepts to understand

Carbon footprint: Exposure to high emitters in the portfolio, expressed in tCO₂e/\$M invested. Financed emissions (explained above) are divided by the portfolio value, the same approach for listed companies and private issuers is applied in this metric.

Dividend yield: The dividend yield reflects distributions declared over the past twelve months as a percentage of the mid-market price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. Reported yields reflect RLAM's current perception of market convention around timing of bond cash flows.

ESG Integration: The consideration of environmental, social and governance (ESG) risk as part of the investment process. ESG integration does not mean the fund is trying to achieve a particular positive ESG outcome. Please check prospectus documentation for details on specific fund-level objectives.

Efficient Portfolio Management (EPM) techniques: The Fund may engage in EPM techniques including holdings of derivative instruments. The use of these instruments may expose the Fund to volatile investment returns and increase the volatility of the net asset value of the Fund. EPM techniques may involve the Fund entering into transactions with counterparties where there may be a risk of counterparty default. The Fund's ability to use EPM strategies may be limited by market conditions, regulatory limits and tax considerations.

Financed emissions: The emissions from activities in the real economy that are financed through lending and investment portfolios, expressed in tCO₂e. Emissions are attributed to a portfolio based on the portion of the company's value the portfolio holds, and using different accounting values for public and private corporates. We provide financed emissions for scope 1 and 2 emissions.

Pricing: The Fund's price may swing to bid or offer to protect existing investors from the costs associated with buying or selling the fund's underlying assets when other investors are entering or leaving the fund. Performance is based on this pricing.

Weighted Average Carbon Intensity (WACI): Portfolio's exposure to carbon-intensive companies, expressed in tCO₂e / \$M revenue. Scope 1 and scope 2 GHG emissions are divided by companies revenues, then multiplied based on portfolio weights (the current value of the investment relative to the current portfolio value). The WACI is calculated as a weighted average sum of the holdings with carbon intensity coverage.

Fund risks

Counterparty risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

EPM techniques risk: The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Emerging markets risk: Investing in Emerging Markets may provide the potential for greater rewards but carries greater risk due to the possibility of high volatility, low liquidity, currency fluctuations, the adverse effect of social, political and economic instability, weak supervisory structures and accounting standards.

Exchange rate risk: Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

Investment risk: The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Liquidity risk: In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Key concepts to understand

Money market instruments: Investments that pay interest, have a short duration and are designed to maintain a stable value.

Pricing: The Fund's price may swing to bid or offer to protect existing investors from the costs associated with buying or selling the fund's underlying assets when other investors are entering or leaving the fund. Performance is based on this pricing.

Ratings: Credit-rating agencies rate bonds based on the likelihood of them defaulting and being unable to repay their debt.

Redemption yield: The weighted average rate of discount at which the future obligations of interest and capital payments of each of the fund's holdings equates to its current price, gross of relevant fund management costs and gross of tax.

Reverse repurchase agreements: Agreeing to sell a purchased security at a specified later date.

Rolling 12 month period: A rolling 12 month period is any period of twelve months, no matter which day you start on.

Weighted average life: The weighted average of the remaining life (maturity) of each security held in a fund, meaning the time until the principal is repaid in full.

Weighted average maturity: The average length of time to maturity of all underlying securities in the fund weighted to reflect the relative holdings in each instrument, assuming that the maturity of a floating rate instrument is the time remaining until the next interest rate reset to the money market rate, rather than the time remaining before the principal value of the security must be repaid.

Fund risks

Counterparty risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Credit risk: Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

EPM techniques risk: The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Inflation risk: Where the income yield is lower than the rate of inflation, the real value of your investment will reduce over time.

Interest rate risk: Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Investment risk: The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Money market fund risks: A Money Market Fund is not a guaranteed investment, and is different from an investment in deposits. The principal invested in the Fund is capable of fluctuation and the risk of loss of the principal is to be borne by the investor. The Fund does not rely on external support for guaranteeing the liquidity of the Fund or stabilising the NAV per share.

Key concepts to understand

Bonds: Securities that represent an obligation to repay a debt, with interest. Investment grade bonds are high quality bonds that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest. Corporate bonds are those issued by companies to raise finance.

Pricing: The Fund's price may swing to bid or offer to protect existing investors from the costs associated with buying or selling the fund's underlying assets when other investors are entering or leaving the fund. Performance is based on this pricing.

Redemption yield: The weighted average rate of discount at which the future obligations of interest and capital payments of each of the fund's holdings equates to its current price, gross of relevant fund management costs and gross of tax.

Rolling 5-Year Period: A rolling 5-year period is any period of five years, no matter which day you start on.

Total return: A total return is a combination of capital growth and income. Capital growth is defined as the rise in an investment's value over time and income as the payment an investment generates, such as dividends or bond coupons.

Fund risks

Charges from capital risk: Charges are taken from the capital of the Fund. Whilst this increases the yield, it also has the effect of reducing the potential for capital growth.

Counterparty risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Credit risk: Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

EPM techniques risk: The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Interest rate risk: Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Investment risk: The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Liquidity risk: In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Fund objectives and investment policy

The fund aims to provide income and capital growth of between 4.5% and 6.5% per annum (after fees have been deducted) over a 3 to 5 year period by investing in bonds worldwide. This cannot be guaranteed and your capital is at risk.

Above is the Investment Objective of the fund. For details on the full fund's Investment Policy please see the KIID.

Relevant risks associated with an investment in this fund are shown below and should be carefully considered before making any investment. Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

Z Income GBP | Data as at 31.03.2026

10 year return of GBP 10,000

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

Risk considerations

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Credit risk: If a borrower of debt provided by the fund or a bond issuer experiences a decline in financial health, their ability to make payments of interest and principal may be affected, which may cause a decline in the value of the fund.

Currency risk: If the fund's investments are denominated in currencies different to the fund's base currency, the fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates. If the investor holds a share class in a different currency to the base currency of the fund, investors may be exposed to losses as a result of movements in currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used for investment purposes and/ or to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Event risk: The fund will take significant positions on companies involved in mergers, acquisitions, reorganisations and other corporate events. These may not turn out as expected and may result in losses to the fund.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk meaning greater uncertainty of returns.

Interest rate risk: The fund may lose value as a direct result of interest rate changes.

Liquidity risk: The fund invests in illiquid instruments, which are harder to sell. Illiquidity increases the risks that the fund will be unable to sell its holdings in a timely manner in order to meet its financial obligations at a given point in time. It may also mean that there could be delays in investing committed capital into the asset class.

Market risk: The value of investments can go up and down and an investor may not get back the amount initially invested.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Capital Erosion: As a result of fees being charged to capital, the distributable income of the fund may be higher, but there is the potential that performance or capital value may be eroded.

Synthetic risk & reward indicator (SRI)

LOWER RISK

Potentially lower reward

HIGHER RISK

Potentially higher reward

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed. Please see the Key Investor Information Document for more information.

Information relating to changes in fund manager, investment objective, benchmark and corporate action information

On 30.07.2025, the fund's investment policy was changed. On 17.02.2017 Schroders Monthly High Income Fund changed its name to Schroders High Yield Opportunities Fund.

Benchmarks: (If applicable)

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark. The fund is not managed with reference to a benchmark. The comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy.

Important information

Costs:

Certain costs associated with your investment in the fund may be incurred in a different currency to that of your investment. These costs may increase or decrease as a result of currency and exchange rate fluctuations.

If a performance fee is applicable to this fund, details of the performance fee model and its computation methodology can be found in the fund's prospectus. This includes a description of the performance fee calculation methodology, the dates on which the performance fee is paid and details of how the performance fee is calculated in relation to the fund's performance fee benchmark, which may differ from the benchmark in the fund's investment objective or investment policy.

For further information regarding the costs and charges associated with your investment, please consult the funds' offering documents and annual report.

General:

For help in understanding any terms used, please visit address <https://www.schroders.com/en-gb/uk/individual/glossary/> The fund is an authorised unit trust. Subscriptions for fund units can only be made on the basis of its latest Key Investor Information Document, Supplementary Information Document and Prospectus, together with the latest audited annual report (and subsequent unaudited semi-annual report, if published), copies are available in English and can be obtained, free of charge, from Schroder Unit Trusts Limited. These can be requested via our website at www.schroders.co.uk, or by calling the Investor Services Team on 0800 182 2399 requesting a printed version. Any reference to regions/ countries/ sectors/ stocks/ securities is for illustrative purposes only and not a recommendation to buy or sell any financial instruments or adopt a specific investment strategy. Reliance should not be placed on any views or information in the material when taking individual investment and/or strategic decisions. The material is not intended to provide, and should not be relied on for, accounting, legal or tax advice, or investment recommendations. Past Performance is not a guide to future performance and may not be repeated.

The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Schroders has expressed its own views and opinions in this document and these may change. Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Vanguard FTSE U.K. All Share Index Unit Trust (the "Fund")

GBP Accumulation Units

ISIN: GB00B3X7QG63

Manager: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to track the performance of the FTSE All-Share Index (the "Index").
- The Index is a free-float market-capitalisation weighted index representing the performance of all eligible companies listed on the London Stock Exchange's main market, which pass screening for size and liquidity. Free-float means that only shares readily available in the market are included when calculating a company's weight in a given index and excludes locked-in shares (such as those held by governments). Market-capitalisation is the value of a company's outstanding shares in the market and shows the size of a company.
- The Fund is a passive fund which means it takes the form of tracking a specific index in order to replicate its performance.
- The Fund attempts to: 1. Track the performance of the Index by investing in all component shares of the Index in the same proportion as the Index. Where not practicable to fully replicate, the Fund will use a sampling process. 2. Remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management"). A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.

- The currency of the unit class is GBP.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund is appropriate for long-term investment. You should have an investment horizon of at least 5 years.
- Income from the Fund will be reinvested and reflected in the price of units in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Units in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the Prospectus). A list of the days on which units in the Fund cannot be bought or sold is available on: <https://fund-docs.vanguard.com/Vanguard-FTSE-U.K.All-Share-Index-UT.pdf>

For further information about the objectives and investment policy of the Fund and Vanguard's relationship with the Index provider, please see Appendix 1 and the "Disclaimer" section of the Vanguard FTSE U.K. All Share Index Unit Trust prospectus (the "Prospectus") on our website at <https://global.vanguard.com>

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 5 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk.** The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk.** Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. This could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Index tracking risk.** The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk.** As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Use of derivatives.** The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

For further information on risks please see the "Risk Factors and Performance" section of the Prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.06%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures and in some cases you might pay less. Investors can find out the actual entry and exit charges from their distributor and or adviser.

The ongoing charges figure is based on expenses for the year ended 31 December 2025. This figure may vary from year to year. It excludes portfolio transaction costs.

For further information about charges please see the sections entitled "Buying Units", "Redeeming Units", "Charges and Expenses", "Dilution Adjustment" and Appendix 1 of the Prospectus on our website at <https://global.vanguard.com>

Past performance

- **Past performance:**
- **Is not a reliable indication of future performance.**
- Includes ongoing charges and the reinvestment of income. It excludes entry and exit fees.
- Has been calculated in GBP.
- Units in the Fund were first issued in 2009.
- This unit class was launched in 2009.

Practical information

- **Trustee:** State Street Trustees Limited.
- **Documents, prices of units and further information:** You can obtain copies of the Prospectus and the latest annual and semi-annual report and accounts for the Fund along with the latest published prices of units and other practical information, from our website at <https://global.vanguard.com>. The documents are available in English and are free of charge.
- **Prices:** The last published prices of units in the Fund are also available from the FT's website www.ft.com or <https://global.vanguard.com>.
- **Tax:** The Fund is subject to the tax laws of the United Kingdom. Depending on your country of residence, this may have an impact on your personal tax position. You are recommended to consult your professional tax adviser.
- **Liability:** VIUK may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the Fund.¹
- **Units:** The Fund has both accumulation and income units. You may switch some or all of your shares of one type, to shares of another type within the Fund or other funds managed by VIUK. Details of switching are provided in the Prospectus.
- Information about other classes of unit offered by the Fund can be found in the prospectus or from our website at <https://global.vanguard.com>.
- Further information on the Index Provider please see the Fund's prospectus.
- **Remuneration policy:** Details of the Vanguard European Remuneration Policy are available at <https://www.ie.vanguard/content/dam/intl/europe/documents/ch/en/ucits-v-remuneration-policy.pdf> including: (a) a description of how remuneration and benefits are calculated; and (b) the identities of persons responsible for awarding remuneration and benefits. A paper copy of these details may be obtained, free of charge, on request from the Head of Human Resources, Europe, Vanguard Asset Services, Limited, 4th Floor The Walbrook Building, 25 Walbrook, London EC4N 8AF.

abrdn Short Dated Global Corporate Bond Tracker Fund

B Accumulation GBP

31 January 2024

Objective

To generate income and some growth over the long term (5 years or more) by tracking the return of the Bloomberg Global Aggregate Corporate 1-5 year Index (Hedged to GBP).

Performance Target: To match the return of the Bloomberg Global Aggregate Corporate 1-5 year Index (Hedged to GBP) (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target. The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

Portfolio Securities

- The fund will invest at least 90% in bonds that make up the Bloomberg Global Aggregate Corporate 1-5 year Index (Hedged to GBP).
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives and exchange-traded funds.
- The fund will invest primarily in investment grade bonds, as defined by the index provider.
- The fund may also invest in government and sub-sovereign bonds, other funds (including those managed by abrdn), money-market instruments, and cash.

Performance

Cumulative and annualised performance (%)

	1 month	6 months	Year to date	1 year	3 years	5 years

Risk and reward profile

Lower risk Typically lower rewards Higher risk Typically higher rewards

This indicator reflects the volatility of the fund's share price over the last five years. See Key Investor Information Document (KIID) for details.

Key risks

- The value of investments and the income from them can fall and investors may get back less than the amount invested
- Tracking Error Risk - The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- Currency Hedged Indices Risk - Due to timing differences, currency hedging applied to the fund may differ to that of the index. This may mean that the fund's performance deviates from that of the index.
- Credit Risk - The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.

Investor Services
0345 113 69 66

www.aberdeenstandard.com

Management process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the Bloomberg Global Aggregate Corporate 1-5 year Index (Hedged to GBP) ("tracking error") will be in the region of 0.0-0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, coupon reinvestment, fund expenses such as annual management charges, significant inflows / outflows and the cash management.
- The tracking error may be affected if the times at which the fund and the Bloomberg Global Aggregate Corporate 1-5 year Index (Hedged to GBP) are priced are different. The fund is valued at 12:00, but the Bloomberg Global Aggregate Corporate 1-5 year Index (Hedged to GBP) is valued at market close and so therefore the tracking error of the fund at Valuation Point may appear to be higher than if the fund and the Bloomberg Global Aggregate Corporate 1-5 year Index (Hedged to GBP) were priced at the same time.
- Non-Sterling denominated assets will typically be hedged back to Sterling to reduce exposure to currency rate movements.

A	43.30
BBB	43.30
N/R	4.10

- (e) Interest Rate Risk - The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- (f) Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

Risk stats

Effective Duration [^]	2.59
Nominal Weighted Average Life [^]	2.83
Tracking Error % (p.a.) [^]	0.15
Yield to worst % [^]	4.52

Derivative usage

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Currency forwards are used to reduce (hedge) risk related to currency movements on non-Sterling assets in order to match the return of the currency hedged benchmark.
- Derivatives may also be used to reduce tracking error by enabling the fund to match the maturity profile ("duration") of the Bloomberg Global Aggregate Corporate 1-5 year Index (Hedged to GBP).
- Derivative usage in the fund otherwise is expected to be very limited. Benchmark DetailsThe Benchmark Index rebalances on a monthly basis. Further details regarding the Benchmark Index (including its constituents) are available on the index provider's website at <https://www.bloomberg.com/professional/product/indices/bloomberg-fixed-income-indices/>

To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Key Investor Information Documents and Prospectus which are available on our website www.abrdn.com The Prospectus also contains a glossary of key terms used in this document.

¹The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the Fund. It is made up of the Annual Management Charge (AMC) of 0.10% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the Fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds.

²The Yield to Maturity as at 31/12/2023 is the yield that would be realised on a bond or other debt instrument if the security was held until the maturity date.

³These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

The Fund's Authorised Corporate Director is abrdn Fund Managers Limited.

The fund is a sub-fund of abrdn OEIC IV, an authorised open-ended investment company (OEIC).

Source: Lipper Limited from 07 March 2001 to 31 March 2026. Data prior to 7 March 2008 reflects class R accumulation GBP. All figures show total returns with dividends and/or income reinvested, net of all charges. Performance does not take account of any costs incurred when investors buy or sell the fund. Returns may vary as a result of currency fluctuations if the investor's currency is different to that of the class. This class may have charges or a hedging approach different from those in the IA sector benchmark.

Market volatility risk

The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

See Page 3 for further risk considerations.

*The OCF (ongoing charge figure) covers the annual operating expenses of running the fund. Additional costs may be incurred, such as portfolio transaction costs and transfer taxes, which may reduce performance. It is calculated using the most recent data available. Further information about the fund's charges can be found in the Key Investor Information Document and by visiting: artemisfunds.com/funds/charges-and-costs/

Risk considerations

To ensure you understand whether this fund is suitable for you, please read the Key Investor Information Document (KIID/KID) which is available, along with the fund's Prospectus, from artemisfunds.com or fundinfo.com

Market volatility risk

The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

Currency risk

The fund's assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund's value.

Charges from capital risk

Where charges are taken wholly or partly out of a fund's capital, distributable income may be increased at the expense of capital, which may constrain or erode capital growth.

Risk reward profile

Potentially lower rewards ← Lower risk → Potentially higher rewards
Higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The SRRRI is calculated on an ongoing basis and reflects the level of risk as at the date shown on this factsheet. The fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the fund. The figure highlighted in the risk reward profile is the Synthetic Risk and Reward Indicator (SRRRI). For more information visit artemisfunds.com/glossary

Benchmark and IA sector

FTSE World Europe ex UK Index

A widely-used indicator of the performance of European stockmarkets, in which the fund invests. It acts as a 'comparator benchmark' against which the fund's performance can be compared. Management of the fund is not restricted by this benchmark.

IA Europe Excluding UK Sector

A group of other asset managers' funds that invest in similar asset types as this fund, collated by the Investment Association. It acts as a 'comparator benchmark' against which the fund's performance can be compared. Management of the fund is not restricted by this benchmark.

Fund and manager ratings

Third party endorsements are not a recommendation to buy. Ratings shown are using the most recent data. For sources, dates and other information, visit www.artemisfunds.com/endorsements

Other information

This is a marketing communication. Before making any final investment decisions, and to understand the investment risks involved, refer to the fund prospectus and KIID/KID, available in English and in your local language (depending on local country registration), from the relevant fund page or literature section on www.artemisfunds.com. The documents can also be found on www.fundinfo.com.

Artemis does not provide investment advice on the advantages or suitability of its products and no information provided should be viewed in this way. Artemis only provides information about its own products and services and does not advise investors. Should you be unsure about the suitability of an investment, you should consult a suitably qualified professional adviser.

Investment in a fund concerns the acquisition of units/shares in the fund and not in the underlying assets of the fund. Reference to specific shares or companies should not be taken as advice or a recommendation to invest in them.

The fund is an authorised unit trust scheme. For further information, visit www.artemisfunds.com/funds/fund-structures

Third parties (including FTSE, Russell, MSCI and Refinitiv) whose data may be included in this document do not accept any liability for errors or omissions. For information, visit www.artemisfunds.com/resources/third-party-data

Any research and analysis in this communication has been obtained by Artemis for its own use. Although this communication is based on sources of information that Artemis believes to be reliable, no guarantee is given as to its accuracy or completeness.

Any forward-looking statements are based on Artemis' current expectations and projections and are subject to change without notice.

The **historic yield** reflects distributions declared over the past 12 months as a percentage of the price. It does not include any preliminary charge and investors may be subject to tax on their distributions. The historic yield is not an indicator of the future performance of the fund. The payment of income and its level is not guaranteed.

Visit www.artemisfunds.com/resources/glossary-of-terms for an explanation of investment terms.

Issued by Artemis Fund Managers Ltd which is authorised and regulated by the Financial Conduct Authority.

HSBC Index Tracker Investment Funds

American Index Fund

Marketing communication | Monthly report 31 March 2026 | Share class Acc C

Investment objective

The Fund aims to track the performance of the S&P 500 Index (the "Index") before the deduction of charges and tax

Investment strategy

The Fund will invest directly in shares (equities) of all of the companies that make up the Index and in the same or very similar proportions in which they are included in the Index. However, there may be circumstances when it is not possible or practical for the Fund to invest in shares of all the companies of the Index. The Fund's performance is measured against the Index, because the Fund intends to track the performance of the Index. The Index is made up of the 500 largest stock market listed companies in the United States of America, as defined by the Index provider.

Main risks

- The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- The Fund may be concentrated in a limited number of securities, economic sectors and/or countries and as a result, may be more volatile and have a greater risk of loss than more broadly diversified funds.

Risk disclosures

- To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

PASSIVE

iShares UK Gilts All Stocks Index Fund (UK)

Class D British Pound

BlackRock Collective Investment Funds

iShares
by BlackRock

March 2026

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-Mar-2026. All other data as at 09-Apr-2026.

This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) by tracking closely the performance of the FTSE Actuaries UK Conventional Gilts All Stocks Index, the Fund's benchmark index.
- The Fund is passively managed and the investment manager has limited discretion to select the Fund's investments and in doing so may take into consideration the benchmark index. The Fund invests in fixed income securities (such as bonds) that make up the benchmark index and, at the time of purchase, comply with the credit rating requirements of the benchmark index.
- The Fund's benchmark index measures the performance of Sterling denominated United Kingdom (UK) Government fixed income securities (gilts). The fixed income securities will have a credit rating which reflects that of the UK Government. The fixed income securities will pay income according to a fixed rate of interest.

RISK INDICATOR**Lower Risk**

Potentially Lower Rewards

Higher Risk

Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

GLOSSARY

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.

Data Coverage %ⁱⁱ is available input data for rating calculation at the Pillar level

Analyst Driven %ⁱ is the analyst input into the overall rating assignment, including direct analyst coverage and inheritance of an analyst-rated pillar

Yield to Maturity: Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTM's based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

IMPORTANT INFORMATION:

** The Morningstar Medalist RatingTM is the summary expression of Morningstar's forward-looking analysis of investment strategies using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Analysts assign three pillar ratings (People, Parent and Process) based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. For more detailed information about these ratings and methodology, please go to global.morningstar.com/managerdisclosures. The ratings are not statements of fact, nor credit or risk ratings. The rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks which may cause expectations not to occur or to differ from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions, (iv) involve the risk that the return target will not be met due to unforeseen changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange and tax rates, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product.

JPM Global (ex-UK) Bond Fund

Class: JPM Global (ex-UK) Bond Fund C - Gross Accumulation

Fund overview

ISIN GB00B235J081	Sedol B235J08	Bloomberg JPMGXCA LN	Reuters GB00B235J081.LUF
Investment objective: To provide income with the prospect of capital growth from investment anywhere in the world, including emerging markets, in non-Sterling denominated bonds in any economic sector.			
Investment approach			
<ul style="list-style-type: none"> • Uses a globally integrated research driven investment process that focuses on analysing fundamental, quantitative and technical factors across countries, sectors and issuers. • Targets diversified sources of portfolio return – including duration management, yield curve positioning, inflation and cross markets trades. • Invests primarily in non-sterling denominated bonds in any economic sector. 			
BENCHMARK USES			
The Fund is actively managed. The Benchmark is a Performance Comparator and the Fund will bear some resemblance to its benchmark. The Benchmark has been chosen as it reflects the main investment universe and strategy for the Fund.			
Portfolio manager(s)	Share class	Class launch	
Iain Stealey Seamus Mac Gorain Nicholas Wall	currency GBP	1 Oct 2012	
Fund reference	Fund assets	Domicile United Kingdom	
currency GBP	£464.5m	Entry/exit charges	
Fund launch	Fund launch	Entry charge (max) 0.00%	
5 Nov 1979	NAV 123.50p	Exit charge (max) 0.00%	
		Ongoing charge 0.50%	
ESG information			
ESG approach - Integrated			
ESG Integration is the systematic inclusion of financially material ESG factors, alongside other relevant factors, in investment analysis and investment decisions with the goals of managing risk and improving long-term returns. ESG integration does not by itself change this product's investment objective, exclude specific types of companies or constrain its investable universe. This product is not designed for investors who are looking for a product that meets specific ESG goals or wish to screen out particular types of companies or investments, other than those required by any applicable law such as companies involved in the manufacture, production or supply of cluster munitions. ESG integration does not imply that the Fund is marketed or authorised as an ESG product in any jurisdiction where such authorisation is required.

Key risks

The Fund is subject to **Investment risks** and **Other associated risks** from the techniques and securities it uses to seek to achieve its objective.

The table below explains how these risks relate to each other and the **Outcomes to the Shareholder** that could affect an investment in the Fund.

Investors should also read [Risk Descriptions](#) in the Prospectus for a full description of each risk.

Investment risks *Risks from the Fund's techniques and securities.*

Techniques	Securities	
Derivatives	China	- Investment grade debt
Hedging	Contingent convertible bonds	- Below investment grade debt
	Debt securities	- Unrated debt
	- Government debt	- Emerging markets

Other associated risks *Further risks the Fund is exposed to from its use of the techniques and securities above.*

Credit	Interest rate	Market
Currency	Liquidity	

Outcomes to the Shareholder *Potential impact of the risks above*

Loss	Volatility	Failure to meet the Fund's objective.
Shareholders could lose some or all of their money.	Shares of the Fund will fluctuate in value.	

General Disclosures

Before investing, obtain and review the current Prospectus, Key Investor Information Document (KIID) and the Key Features Document/Terms & Conditions for this fund which are available in English from JPMorgan Asset Management (UK) Limited or at <https://am.jpmorgan.com>.

This material should not be considered as advice or an investment recommendation. Fund holdings and performance are likely to have changed since the report date.

To the extent permitted by applicable law, we may record telephone calls and monitor electronic communications to comply with our legal and regulatory obligations and internal policies. Personal data will be collected, stored and processed by J.P. Morgan Asset Management in accordance with our EMEA Privacy Policy www.jpmorgan.com/emea-privacy-policy

For additional information on the fund's target market please refer to the Prospectus.

The risk indicator is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class. The risk and reward category shown above is not guaranteed to remain unchanged and may change over time. A Share Class with the lowest risk rating does not mean a risk-free investment. See Key Investor Information Document (KIID) for details.

As at 15/04/18 the investment objective of the Sub-Fund was changed.

Up to 100% of the value of the Scheme Property of the Fund may be invested in such securities issued or guaranteed by or on behalf of the Government of the United Kingdom (including the Scottish Executive, the Executive Committee of the Northern Ireland Assembly, the National Assembly of Wales) Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Japan, Liechtenstein, Luxembourg, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland and United States or by one of the following international organisations: African Development Bank, Asian Development Bank (ADB), Council of Europe Development Bank, Deutsche Ausgleichsbank (DTA), Eurofima, European Bank for Reconstruction and Development (EBRD), European Investment Bank (EIB), Inter-American Development Bank (IADB), International Bank for Reconstruction and Development (IBRD), International Finance Corporation (IFC), Kreditanstalt für Wiederaufbau (KfW), LCR Finance plc, and Nordic Investment Bank (NIB). Please refer to the

investment policy in the latest available prospectus.

Performance information

Source: J.P.Morgan Asset Management. As at 02/07/17 share class performance shown is based on the quoted price of the share class, assumes any gross income was reinvested, and includes ongoing charges but not any entry or exit fees. Prior to this date the quoted price of the share class, assumed any net income was reinvested. Indices do not include fees or operating expenses and you cannot invest in them.

The Yield reflects the gross amount that may be distributed over the next 12 months as a percentage of the quoted price at the date shown. It is calculated from current market information and is provided to shareholders as an estimate but should not be taken as a guaranteed yield. The Yield calculation does not include the impact of any Entry charge that may be paid or that investors may be subject to tax on income distributions. Where a portion of the fund's expenses are charged to capital this has the effect of increasing the distribution for the year and constraining the fund's capital performance to an equivalent extent.

The performance shown prior the launch date of this share class relates to the A share class. The A share class performance has not been amended or simulated to adjust for the lower ongoing fees of the C share class.

Holdings information

Maturity Date refers to the maturity/reset date of the security. For those securities whose reference coupon rate is adjusted at least every 397 days, the date of the next coupon rate adjustment is shown.

Not rated includes marked-to-market impact from FX forwards

Unrated onshore Chinese bond issues may be deemed investment grade to the extent that their issuers hold an international investment grade rating by at least one independent international rating agency.

VaR is a means of measuring the potential loss to a Sub-Fund due to market risk and is expressed as the maximum potential loss at a 99% confidence level. The holding period for the purpose of calculating global exposure is one month.

Information Sources

Fund information, including performance calculations and other data, is provided by J.P. Morgan Asset Management (the marketing name for the asset management businesses of JPMorgan Chase & Co and its affiliates worldwide).

Issuer

JPMorgan Asset Management (UK) Limited Registered address: 25 Bank Street, Canary Wharf, London E14 5JP, United Kingdom. Authorised and regulated by the Financial Conduct Authority. Registered in England No. 01161446.

Definitions

NAV Net Asset Value of a fund's assets less its liabilities per Share.

Quoted Price The single price at which all client orders are executed.

Analyst-Driven % Displays the percentage of Analyst's input into the overall rating assignment, including direct analyst coverage and inheritance of an analyst-rated pillar.

Data Coverage % Displays the percentage of available input data for rating calculation at the Pillar level.

Correlation measures the strength and direction of the relationship between movements in fund and benchmark returns. A correlation of 1.00 indicates that fund and benchmark returns move in lockstep in the same direction.

Alpha (%) a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.

Beta measures a fund's sensitivity to market movements (as represented by the fund's benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant. Usually the higher betas represent riskier investments.

Annualised volatility (%) measures the extent to which returns vary up and down over a given period.

Sharpe ratio performance of an investment adjusting for the

amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.

Tracking error (%) measures how much a fund's returns deviate from those of the benchmark. The lower the number the closer the fund's historic performance has followed its benchmark.

Information ratio measures if a manager is outperforming or underperforming the benchmark and accounts for the risk taken to achieve the returns. A manager who outperforms a benchmark by 2% p.a. will have a higher IR than a manager with the same outperformance but who takes more risk.

Jupiter Asian Income Fund

JASON PIDCOCK | SAM KONRAD | Investment Management

Fund Objective and Investment Policy

The Fund objective is to provide income together with the prospect of capital growth to achieve a return, net of fees, higher than that provided by the FTSE All-World Asia Pacific x JP - Total Return Index over the long term (at least five years). The Fund aims to provide a level of income at least 20% higher than provided by the FTSE All-World Asia Pacific x JP - Total Return Index. At least 70% of the Fund is invested in shares of companies based in the Asia Pacific region (excluding Japan but including Australia and New Zealand). Up to 30% of the Fund may be invested in other transferable securities (including shares of companies based anywhere in the world), open-ended funds (including funds managed by Jupiter and its associates), cash, near cash, money market instruments and deposits.

Risk and Reward Profile

Synthetic Risk Reward Indicator (SRR): The SRR is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The lowest category does not mean 'no risk'. Please see the KIID for further information.

Performance Over 10 Years (%)

Past performance is no guide to the future. Performance data is calculated bid to NAV or NAV to NAV dependent on the period, all performance is net of fees, inc. reinvested.

Risks

Currency (FX) risk - The fund can be exposed to different currencies and movements in foreign exchange rates can cause the value of investments to fall as well as rise. **Pricing risk** - Price movements in financial assets mean the value of assets can fall as well as rise, with this risk typically amplified in more volatile market conditions. **Emerging markets risk** - Emerging markets are potentially associated with higher levels of political risk and lower levels of legal protection relative to developed markets. These attributes may negatively impact asset prices. **Market concentration risk (geographical region/country)** - Investing in a particular country or geographic region can cause the value of this investment to rise or fall more relative to investments whose focus is spread more globally in nature. **Market concentration risk (single name)** - The fund holds a relatively small number of stocks and may therefore be more exposed to under-performance of a particular company or group of companies compared to a portfolio that invests in a greater number of stocks. **Derivative risk** - The fund may use derivatives to reduce costs and/or the overall risk of the fund (this is also known as Efficient Portfolio Management or "EPM"). Derivatives involve a level of risk, however, for EPM they should not increase the overall riskiness of the fund. **Liquidity risk (general)** - During difficult market conditions there may not be enough investors to buy and sell certain investments. This may have an impact on the value of the fund. **Counterparty default risk** - The risk of losses due to the default of a counterparty on a derivatives contract or a custodian that is safeguarding the fund's assets. **Charges from capital** - Some or all of the fund's charges are taken from capital. Should there not be sufficient capital growth in the fund this may cause capital erosion. **Stock Connect risk** - Stock Connect is governed by regulations which are subject to change. Trading limitations and restrictions on foreign ownership may constrain the fund's ability to pursue its investment strategy. For a more detailed explanation of risk factors, please refer to the "Risk Factors" section of the Scheme Particulars.

The ongoing charges figure is based on the fixed annual charge as detailed in the Scheme Particulars. With effect from 23/02/24 the fixed annual charge may be subject to a discount based on the value of the Fund's scheme property. The current discount rate, if applicable, can be found at www.jupiteram.com/uk/en/professional/tiered-pricing-on-the-fixed-annual-charge/. Where the Fund invests in other underlying funds, which may include closed-ended funds such as investment trusts, the ongoing charges figure will include the ongoing charges for those funds, and will therefore vary from year to year. The ongoing charges figure excludes portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.

Benchmark Information: Target benchmark - FTSE All-World Asia Pacific x JP - Total Return Index. The FTSE All-World Asia Pacific x JP - Total Return Index is an industry standard index and is one of the leading representations of the Asia Pacific ex-Japan region stock markets. It is easily accessible and provides a fair reflection of the Fund Manager's investment universe and a good relative measure to assess performance outcomes. Comparator benchmark - IA Asia Pacific Ex Japan Sector. Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics. This Fund is classified in the IA Asia Pacific Ex Japan Sector. The Fund is actively managed. This means the fund manager is taking investment decisions with the intention of achieving the Fund's investment objective; this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market. The fund manager is not in any way constrained by the benchmark in their portfolio positioning, and will not hold all, or indeed may not hold any, of the benchmark constituents.

No part of this document may be reproduced in any manner without the prior permission of JUTM and/or JAM.

Jupiter Factsheets - Glossary of Terms

Absolute return: the total return of an asset, portfolio or fund over a given period of time OR an investment approach that attempts to achieve a return which is not benchmarked against an index.

Ask / Bid price: the lowest price a seller is willing to sell a security for / the highest price a buyer is willing to pay for a security.

Bond: a debt instrument ('I Owe You') issued by a company (corporate bond), government (sovereign/government bond) or other institution in order to raise money. In most cases, bonds pay a fixed interest rate (coupon) over a fixed period of time and will be repaid on a particular date. See **Coupon**.

Convertibles: securities (e.g. bonds or preference shares) that can be exchanged at some point in the future for a specified number of shares at a specified price of the company issuing the securities. See **Bond**.

Coupon: denotes the interest in % paid on a bond See **Bond**.

Credit rating: an assessment of a borrower's credit worthiness, i.e. the likelihood of the borrower to repay its debts.

Derivative: a financial instrument that derives its value from its underlying assets. Common underlying assets include stocks, bonds, commodities, currencies, interest rates and market indices. Futures contracts, forward contracts, options and swaps are the most common types of derivatives. Derivatives can be purchased 'on margin', i.e. at a fraction of the value of the underlying asset. Thus, they are 'leveraged' instruments where the risk of loss can be greater than the initial outlay. Derivatives can be used like insurance contracts (i.e. to hedge market risk) or for investment purposes. See **Hedge, Leverage**.

Distribution Yield: reflects the amounts that may be expected to be distributed over the next twelve months as a percentage of the price of the fund as at the date shown. It is based on a snapshot of the portfolio on that day. It does not include any preliminary charge and investors may be subject to tax on distributions.

Duration/Modified Duration: Duration estimates the sensitivity of a bond or bond fund to changes in interest rates. It is measured in years. The longer a bond's duration, the more sensitive it is to interest rate movements. Modified duration estimates the effect that a 1% change in interest rates will have on the price of a bond or bond fund.

Economic Gross: the gross exposure adjusted to account for investments with mutually exclusive outcomes, for example a short position hedge on a share that is also held as a long position. See **Gross exposure, Long/short position, Hedge**.

Effective duration: estimates the sensitivity of a bond's price to changes in benchmark interest rates. Effective duration is required for the measurement of interest rate risk for complex types of bonds. See **Bond**.

Engagement: means dialogue with management teams and boards, including non-executive directors. Engagement enables us to assess and influence how businesses are managed.

Equity: a share representing an ownership interest in a company. Equity market means stock market.

Exchange Traded Fund (ETF): a fund vehicle that is traded like a stock on a stock exchange. It is used to track and mimic the performance of a specific market index.

Exposure: describes the level of risk to a particular asset, asset type, sector, market or government. Also, the directional market exposure of a (absolute return) fund. See **Absolute Return, Gross/Net exposure**.

Fixed interest/income: denotes debt instruments (securities) that pay a fixed interest rate (e.g. bond, commercial paper). Also, a universal term for bond or debt investing. See **Bond**.

Floating rate note (FRN): a bond with a variable interest rate. The interest rate is variable as it is tied to a benchmark such as LIBOR (London Interbank Offered Rate). See **Bond**.

Futures: an exchange traded contract between two parties to buy or sell a commodity or a financial instrument at a pre-determined price at a future date. See **Bond Future, Derivative**.

Gearing: measures a company's borrowings (debt) as a proportion of assets. See **Leverage**.

Gross exposure: the percentage value of the long positions plus the percentage value of the short positions. See **Net exposure**.

Hedge: an investment designed to reduce the risk of adverse price movements in an asset by taking an offsetting position. Derivatives are usually used as hedging tools. See **Derivative**.

High Water Mark: the highest level that a fund's net asset value (NAV) has reached at the end of any 12-month accounting period. See **Net Asset Value**.

High yield bond: a bond with a high coupon payment and typically a low/no credit rating (below investment grade, e.g. BBB-). See **Bond, Coupon**.

Historic yield: reflects distributions declared over the past twelve months as a percentage of the price, as at the date shown. It does not include any initial charge and investors may be subject to tax on their distributions.

Hurdle Rate: the minimum level of return required before a fund can charge a performance fee. See **Performance fee**.

Leverage: the use of financial instruments (e.g. debt) to increase the potential return of an investment. See **Notional value**.

Liquidity: measures how easily an asset or security can be converted into cash.

Long/short position: a long position is buying a security with the expectation that it will deliver a positive return if its value goes up and a negative return if its value falls. Conversely, a short position involves selling a borrowed security with

the expectation of buying it back at a lower price to make a profit. However, if the security goes up in value, a short position will make a loss.

Maturity: refers to a finite time period at the end of which a security/debt instrument is due to be repaid. See **Bond**.

Money market: markets in which short-term (less than one year) debt instruments are traded. Money market instruments are typically cash deposits and commercial papers.

Net asset value (NAV): in relation to a fund, the market value of its assets less its liabilities. The market value is usually determined by the price at which an investor can redeem shares.

Net exposure: the percentage value of the long positions less the percentage value of the short positions. See **Gross Exposure, Long/short Position**.

Non-rated bonds: bonds that are not rated. See **Bond**.

Notional value: commonly used in relation to a derivative, denotes the theoretical value of its underlying asset. See **Derivative**.

Open-ended Investment Company (OEIC): a fund vehicle, which can issue a limitless number of shares whose value are directly linked to the value of its underlying investments. OEICs normally list a single price based on the NAV. See **Net Asset Value**.

Performance fee: a fee paid to an asset manager for generating positive returns above a hurdle rate.

Preferred bonds: have greater seniority when a bond issuer repays its debts. In the event that the issuer cannot repay all its debt, the holders of preferred bonds will be further forward in the queue for repayment than holders of other ('non-preferred') bonds.

Share: a unit of ownership interest in a company or financial asset. Also **Equity**.

SICAV: Société d'Investissement à Capital Variable. A type of open-ended fund widely used in Europe.

Spread: the difference between the bid and the ask price of a single security. It can also refer to the difference in price between two securities. See **Ask/Bid price**.

Stewardship: our responsibility to understand and manage investment risks we take on behalf of our clients. We consider material Environmental, Social and Governance ('ESG') information in the same way as we consider other types of investment analysis. These three factors enable us to evaluate how companies interact with the Environment (such as climate change), Society (human rights) and Governance (management). Stewardship entails a responsibility to monitor and engage with the companies in which we invest.

Sustainability: by appropriately considering ESG risks and engaging with companies, we strive to generate long term, sustainable returns for our clients.

Total return: the capital gain or loss plus any income generated by an investment over a given period.

Underlying Yield: reflects the amounts that may be expected to be distributed, net of expenses, over the next twelve months as a percentage of the price of the fund as at the date shown. It is based on a snapshot of the portfolio on that day. It does not include any preliminary charge and investors may be subject to tax on distributions.

Unit Trust: A fund vehicle which can issue a limitless number of units whose value are directly linked to the value of its underlying investments. Jupiter Unit Trusts are single priced, which means they have one price for buying and selling.

Value at Risk (VaR): value at Risk, a mathematical way of measuring the maximum expected loss of an investment over a period of time.

Volatility: measures how much the price of a security moves up or down over a period of time. A stock that experiences big price swings has high volatility, while one which moves up or down in smaller increments has low volatility.

Yield to Maturity (YTM): measures the annual return an investor can anticipate for holding a particular bond until it matures. When considering an entire bond portfolio, an average yield is used based on the weightings of individual bonds within that portfolio.

FUND AIM

The objective of the Fund is to track the performance of the FTSE Actuaries UK Index Linked Gilt All Stock Index, the "Benchmark Index" before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors

RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

The fund is in category 6 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to fluctuate.

For more information, please refer to the Key Risks section on page 3.

WHO IS THIS FUND FOR?

- This fund may be suitable for investors looking for a combination of income and growth by tracking the index linked gilts market as represented by the index.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

INDEX FUND MANAGEMENT TEAM

The skill set and expertise we have developed over 35+ years in index management has allowed us to continuously evolve our investment processes. The Index Fund Management team comprises 30 fund managers with an average experience of 15 years, supported by 33 broader team members. Management oversight is provided by Dave Barron, Global Head of Index, ETFs & Systematic Solutions. The team also has full access to the resources and research of other specialists within L&G, including economists and strategists.

Higher fund constituents vs. index constituents may be due to liquidity positions, derivatives, short term investments and fractional unit differences.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- This fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the fund depository.
- The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.
- This fund invests in inflation-linked bonds, which are particularly sensitive to changes in inflation rates. Their values are likely to fall when inflation rates fall.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- We may take some or all of the ongoing charges from the fund’s capital rather than the fund’s income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the fund.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.

For more information, please refer to the key investor information document on our website [↗](#)

SPOTLIGHT ON LEGAL & GENERAL

L&G’s asset management division is a major global investor across public and private markets, with £1,176.6 billion in assets under management (as at 31 December, 2025). Our investment philosophy and processes are designed to create value over the long term. We believe that incorporating financially material sustainability criteria, when relevant to our clients, can create attractive returns and drive positive change.

Source: L&G internal data as at 31 December 2025. The AUM disclosed aggregates the assets managed by L&G in the UK, LGIMA in the US and L&G Asia in Hong Kong (2018-2019 only). The AUM includes the value of securities and derivatives positions.

Fees and Expenses

How Much Does it Cost?*

Based on investing **GBP 10,000** in this fund over a 5 year period with an expected return of **5%** per year.

The investment would be worth GBP 12,164.54 and **Total fees** would be **GBP 531.45**

If no fees were charged the investment would be worth GBP 12,762.82, this means your growth rate would be 27.63%

Initial set up fee = GBP 0.00

this might be waived by your distributor
